FORGE

Forge

batch and wireless
application generators

➤ FORGE batch and WLAN Application Generators give you easy-to-use tools for fast customization and validation of your critical applications on CipherLab mobile computers. Using a Microsoft® Windows® environment, FORGE Application Generators let

you quickly define menus and data templates, convert or create databases for wireless environments, and control and monitor database wireless access and activity from desktop or laptop PCs. FORGE is powerful, yet simple to use.

CUSTOMIZE DATA CAPTURE
– FAST AND EASY –
FOR WORKFORCE PRODUCTIVITY

Forge

FORGE tools are easy to use for fast development

Design, test, and deploy new forms—*fast*

Quickly adapt to change and save time using a code-free familiar Windows work environment

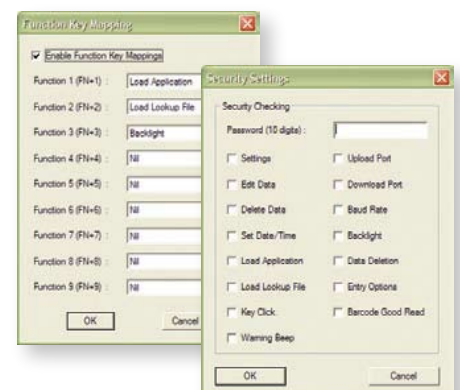

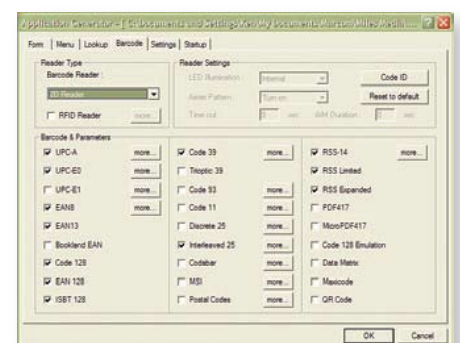

Flexible *and* powerful—for batch and wireless environments

SIMPLE. SMART.

No matter how complex your data collection environment, FORGE batch and wireless Application Generators help simplify information capture to keep databases accurate and secure. Easy and familiar, FORGE tools accelerate response to changes in your business by putting new data capture forms into production.

RICH AND POWERFUL FEATURES

- ▶ Up to 8 fields for broad data definitions
- ▶ Up to 10 forms to adapt capture to a complex data environment
- ▶ Up to 10 different menus to accommodate multiple activities
- ▶ Up to 3 downloadable batch lookup files to cover a variety of data situations
- ▶ Broad selection of data types per field
- ▶ Complete control over menu and lookup file activities
- ▶ Add data time stamps, branch to special functions, and define function keys
- ▶ Security settings create tamper-proof configurations
- ▶ Comprehensive barcode definitions

MASTER THE COMPLEXITIES OF DATA TO RUN ANY BUSINESS FASTER, SMARTER. NO DETAIL IS TOO SMALL, NO TASK TOO MENIAL FOR POWERFUL APPLICATIONS BUILT WITH FORGE.

CipherLab Developer Software

FORGE

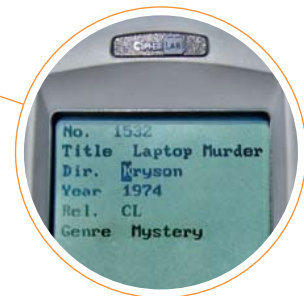

ELIMINATE REWORK

Integrated into FORGE Application Generator software, a graphical simulator lets you test how your menus will work before you deploy your application. You can safely ensure a high-quality application interface that will be easy to understand and use, and will eliminate rework later on.

WORK AND MONITOR WITHOUT WIRES

For wireless environments, our Wireless Database Manager software interfaces your custom template designs built with the FORGE wireless Application Generator to your back-end databases. The Wireless Database Manager gives you a live view of user connections, database activities, and updates, providing a layer of immediate safety and security to all user activities that involve your critical data.

ENSURE A REAL-TIME BUSINESS-WIRELESS APPLICATIONS KEEP DATABASES UP-TO-DATE, INSTANTLY.

USE THE SIMULATOR TO ENSURE WHAT YOU SEE IS WHAT YOU GET.

THE WIRELESS DATABASE MANAGER SOFTWARE HELPS KEEP YOUR DATA SECURE WITH REAL-TIME MONITORING.

FORGE gives you the power to create valuable business tools quickly and easily.

CIPHERLAB PRODUCTS ARE VALUED WORLDWIDE FOR ENGINEERING EXCELLENCE. THE POWERSUITE SERIES IS ANOTHER EXAMPLE OF TECHNICAL INNOVATION AND QUALITY VALUE FOR TODAY'S AIDC SOLUTIONS.

CIPHERLAB

Forge

CipherLab
8000, 8300, and
8500 Series

FORGE _ Application Generator for batch

for all CipherLab mobile computers

Windows interface

Familiar work environment accelerates creating and deploying new forms
No coding

Rich and comprehensive functions

Allows customization of forms for the most demanding and complex data sets and workflows

Full-functioned simulator

Quickly and accurately debug your new forms before you deploy them to the field

Easy to install

Be productive minutes after receiving the software

FORGE _ Application Generator for wireless

for CipherLab 8000, 8300, and 8500 series wireless mobile computers

Windows interface

Familiar work environment accelerates creating and deploying new forms
No coding

Rich and comprehensive functions

Allows customization of forms for the most demanding and complex data sets and workflows

Wireless Database Manager software included

Secure your wireless data infrastructure with live monitoring of user connections, data access, and updates

Full-functioned simulator

Quickly and accurately debug your new forms before you deploy them to the field

Easy to install

Be productive minutes after receiving the software
