Application Versatility

Crossbow dual-screen provides all the benefits of POS, at the same time revolutionized the trade of sales. Additional advertisement revenue is but one benefit. The possibilities are boundless, to name some : product promotion, customer interactive application, electronic cash payment, loyalty system, electronic catalog, information query, etc.

Durable by Design

The injected cast aluminum enclosure is not just for sleek stylish look, it is bred to withstand the harsh environments out there.

Ergonomic in Concept

With its compact all-in-one design and 90-degrees tilting displays, the Crossbow adapts to who ever uses it and to wherever it is placed. Accessories, including side-mount MCR, large easy-to-read customer display and Dallas I-Button reader are integrated by design. External floppy drive and CD-ROM are simple and quick to connect.

Sound Investment Decision

Crossbow combines quality and innovation. For virtually every establishment, this hardware offers the utmost in features and performance while stays affordable. It is the touch-entry system for you.

Dual LCD displays
