PROFESSIONAL SERIES

EDISECURE DCP 360i
DUAL SIDED CARD PRINTER

If Speed and Quality Count, Count on the DCP 360i

The double-sided, edge-to-edge EDIsecure™ DCP 360i Professional Direct-Card Printer was developed for industrial needs and is prepared for plug and play inline lamination. With its versatility and state-of-the-art features, it is the most powerful Direct-Card printer in the world.

Speed and ease of use The EDIsecure™ DCP 360i Professional Direct-Card Printer has the first portrait mode printing engine in its class, making it the fastest full-colour Direct-Card printer on the market. A print speed of 19 seconds per 4-color side is extremely impressive and allows you to print more than 180 full-colour cards per hour. A front loadable colour ribbon cartridge system makes daily handling of the printer very easy. The ribbons have the highest capacity of any desktop Direct-Card printer in the industry.

A powerful printer driver with a graphical user interface similar to the versatile EDIsecure™ XID printer driver helps you to route and control your print jobs. Ongoing development of the printer driver ensures that you are always working with the latest features in this state-of-the-art product.

The card dispenser holds a one hundred standard CR80 cards with a 30mil thickness, while the output hopper receives the same number. This allows for easy use, even overnight without operator supervision.

In addition an incidental benefit of portrait card printing is increased print head life due to the shorter distance of travel across the card saving high volume users on maintenance.

Worlds Fastest Dektop Card Printer 180 YMCKO Cards/Hr

General Specifications

- » 100 Card Input Capacity
- » Easy to Load Ribbon cartridge
- » LCD display
- » Windows® drivers for 2000 and XP
- » 1 year printer warranty
- » 1 year (unlimited passes) printhead warranty

Printing

- » Color dye sublimation or monochrome thermal transfer
- » More than 180 cards per hour
- » 19 seconds per card full-color single-sided (YMCKO)
- » 300 dpi (11.8 dots/mm) print resolution

Bar Codes

- » Bardcodes and other sybologies supported via windows driver interface

Card Specifications

- » Types: PVC, PVC Composite (PVH).
- » Card width/length: ISO CR-80-ISO 7810, 54mm x 86mm
- » Magnetic Stripe-ISO 7811
- » Smart Card-ISO 7816-2
- » Card thickness: 30 mil (.76mm)
- » Card feeder capacity: 100 cards (30 mil)
- » Card output hopper capacity: 100 cards (30 mil)

Communications Interface

- » USB 2.0 (cable included)

Ribbon Specifications

- » Ribbon spool cartridge for easy loading
- » Automatic ribbon detection
- » YMCKO: 750 cards/ribbon
- » YMCKOK: 600 cards/ribbon
- » Monochrome: TBA cards/cartridge

Options

- » Magnetic encoder (30 mil cards only), 3 track HiCo/LoCo
- » Smart card controllers (inc Mifare, HID & Legic)
- » Inline Lamination Unit (Edisecure ILU)

Inline Lamination Option

When combined with the EDIsecure™ Inline Lamination Unit, the DCP360i becomes an advanced lamination machine which can laminate printed cards to increase both visual card security and durability to protect the surface from physical damage.

The DCP360i with ILU is a powerful dual sided print and lamination system.

The ILU can use either laminate patches or overlay film in either clear or hologram.

Please see the EDIsecure™ ILU brochure for additional details.
