- Users can keep track of Parent and Child Samples History efficiently and confidently know which ones they were working on
- Prevent users from losing track of their works
- Easily manage all users who are dealing with particular samples
- Traceability of Samples
- Save time, money and effort
- Low cost with better outcome
- Professional services

How It Works

Existco Sample (Vials) Tracking System is every laboratory's reliable bookkeeper. Users enter information into the system whenever there are new samples.

Barcode labels are printed from the system and put on samples. To find a sample's location, simply scan the barcode or enter search information manually into the system.

The system will show all the samples with its details based on the search criteria. Users can also export search results to excel documents.

At the end of the day, reports come into handy when you need an overview structures and details of your samples.
