

Existco Scan & Print System

Too busy to re-design and print new barcodes after your existing barcodes become scratched, faded or damaged? Is reprinting barcode labels costing you a lot of time, money and effort? ...Talk to us today!

Existco Scan & Print System will make all the pains go away. With this solution, you are able to scan and print an existing barcode label. The information is captured by the barcode scanner and then transferred to a printer that immediately reprints the barcode label. It's that simple. No computer is needed!

Enjoy true freedom with the convenience of a mobile barcode scanner. Don't be tethered with cables. The mobile scanner provides a safe and efficient environment for employees.

The printer is designed to excel in demanding environments. The printer can perform user-defined programs eliminating the need for a computer.

The system is designed to be easy to use. Everything is at your fingertips. It is as easy as scanning a barcode!

This might sound only half of what you are looking for? No problem! Customized software package is our expertise. We will get you exactly what you want!

Features

- Supports standalone printer applications.
- No computer is needed.
- The printer acts as a computer and does all the work.
- Auto-adjusts barcode density based on content.
- Use corded or wireless barcode scanner.
- Print Direct Thermal (without ribbon) or Thermal Transfer (with ribbon)
- Use Direct Thermal for longer lasting and water proof label stock.
- Using latest barcode technology and industry standards.

Benefits

- Standalone system.
- No computer needed to transfer data to printer.
- Fast Reproduction of Barcode Labels.
- Simple easy-to-use system
- Save time and money.
- Low cost with better outcome solution.
- Professional services and supports.
- Simple Scan-to-print system
- Simple and easy to operate.
- Fast Reproduction of Barcodes.

System Requirements

Mains Power Only

How It Works

The thermal label printer has its own smarts and runs a special program designed for and executed on the printer.

The thermal label printer is connected to a barcode scanner in the back of the printer.

You can use either wired or wireless barcode scanners to connect to the printer.

When the printer receives the scanned information, it formats a barcode label and auto-adjusts the barcode density to print the barcode to the best advantage of the label loaded in the printer.

Every barcode scan prints single or multiple labels as per configurations stored in the printer program.

Fast, efficient barcode label reprinting and with great quality.

How good is that?

Why Existco

Existco is a reputable Solution provider with Alliances with the major Brand Names such as Zebra, Intermec, Datalogic, Motorola, Brady and many more.

Existco is also a Microsoft Certified Partners and GS1 Alliance Partner.

Enjoy the professional service and full turnkey solutions at Existco.
