What is ExPCS Point of Sale?

ExPCS - Existco Plant Control System, POS is a modern, end-to-end Point of Sale solution combining fast sales processing, advanced inventory control, integrated EFTPOS, mobility tools, and rich reporting in one platform. Scalable from a single lane to multi-store networks.

Hardware Overview

Point of Sale Hardware Available from ExPCS

Touchscreen PC

Receipt Printer

Card Pin Pad

Barcode Scanner

Label Printer

Customer Display

Cash Drawer

Scales

Video Camera

Digital Signage

Key System Takeaways

- ✓ Robust client-server architecture with reliable wired and Wi-Fi connectivity, supported by a recommended internet gateway with 4G backup.
- ✓ Preferred USB/Ethernet device connections; legacy serial supported where required (e.g., scales). OPOS mode supported and preferred.
- ✓ Certified payments via Linkly (PC-EFTPOS) and Tyro.

Core Features

POS Capabilities

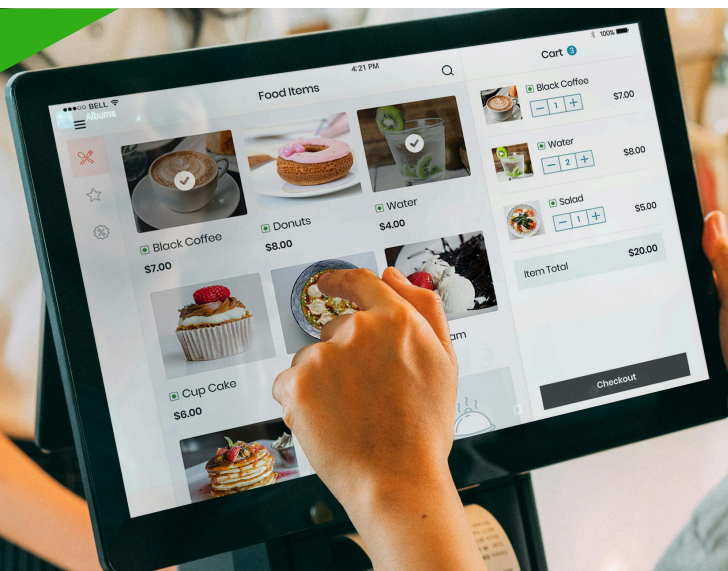

- Customisable, resizable product menus and unlimited line items
- Automatic price/tax, item attributes, manager overrides, returns/voids
- Multi-tender (cash, EFTPOS, gift cards, vouchers)
- Mix & Match, promotions, deposits, store credit
- Daily sales graphs, X/Z/ZZ reports, blind close; receipt/invoice branding
- Journal search/print by POS, batch or receipt number
- Customer accounts with visit and spend history
- Payments via Linkly (PC-EFTPOS) and Tyro integrations

Inventory & Back-Office

- Item types: standard/service, serialised, kits, weighted, non-inventory, fuel/voucher
- Supplier & cost management; purchase orders; receiving & transfers
- Stocktake (including external file processes); unlimited aliases & substitutes
- Shelf-edge/barcode label printing (20+ formats)
- Full history & drill-down reporting; export to multiple formats
- Power BI and Excel PowerPivot integrations

Mobility

- Purchase Order receiving, stock transfers, stocktaking, product query, price changes
- Mobile label printing—ideal for floor and back-of-house tasks

Core Features

Typical Setup & Payments

- ✓ **Single or multi-store:** All tills connect to the in-store network; a micro-server hosts the database. Recommended: internet gateway router with 4G backup for resilience.
- ✓ **PC-EFTPOS (Linkly) option:** Install PC EFTPOS client & server on each till; run the gateway on the server. Merchant Services supply gateway credentials; Existco configures the system.
- ✓ **Tyro option:** Install Tyro POS client on each till; pin pads connect directly to Tyro over the internet. Existco configures and tests all pin pads.

Security & Reporting

- Role-based access and password policies
- 100+ built-in reports with editor, filtering/grouping, drill-down
- Export to multiple formats; charts; edit from report
- Integrates with Microsoft Power BI & Excel PowerPivot

Customer Accounts & Accounting

- Find customers by name, postcode or ID; mailing lists
- Purchase history (dates, amounts)
- Connect to MYOB, Xero, Reckon (QuickBooks) and Greentree

Why Choose ExPCS POS?

- ✓ Proven in retail, supermarkets, trade and specialty stores
- ✓ POS, inventory, mobility, payments, eCommerce and reporting in one
- ✓ Local support by Existco; flexible architecture that grows with you
