

multiply your power

A small business has many ongoing needs: to better organize and safeguard business information, to communicate effectively and professionally with customers and suppliers, and to make the most of your existing computers and office equipment.

Wish that there were more hours in the day?

SBS 2008 helps your company become more efficient and flexible so you can work smarter, not harder.

Worry that your business information is not secure?

SBS 2008 helps keep your vital business data secure with antispam, antivirus, and state-of-the-art security technology.

Need to work while you are out of the office?

SBS 2008 gives you the tools to connect with customers and be responsive no matter where you are.

With limited time and resources to get the job done, SBS 2008 can simplify your daily activities while saving you time and money. For greater business capacity and a new competitive edge, the time for SBS 2008 is now.

WINDOWS SMALL BUSINESS SERVER 2008

Windows Small Business Server 2008 (SBS 2008) is an "all-in-one" server solution designed to help you keep your data more secure, your company more productive, and gives you the tools to present a more professional image to customers. It provides many of the features used by larger companies—e-mail, Internet connectivity, internal Web sites, remote access, support for mobile devices, file and printer sharing, backup, and restore—all at one affordable price.

Use an Affordable, Integrated Solution

Windows Small Business Server 2008 is designed for small businesses. It brings together the Microsoft® technologies that small businesses need most into a single solution. These technologies are integrated to deliver a comprehensive network at an affordable price.

Protect Your Business Data

Windows Small Business Server 2008 helps protect your vital business information from loss, by backing up the data on your network and helping enable you to recover accidentally deleted files. SBS 2008 also enables you to recover data on your network in the event of disaster. With easy to use interfaces, you or your IT consultant gain better control of your data, PCs and network.

Grow Your Business Capacity

Windows Small Business Server 2008 gives you secure access to business contacts, calendars, e-mail, files, and other important desktop resources from any Internet-connected PC, from virtually anywhere at any time, so you can be productive while you're away from the office or on the road.

What is a server?

A server is a specialized computer that is used to manage information and resources in a central location. This powerful computer is loaded with server software that is designed to perform specific tasks such as print processing, Internet connectivity, and e-mail for all the "client" computers. Clients can be individual computers, printers, or mobile devices.

Discover how Windows Small Business Server 2008 is designed and priced especially for small businesses.

	BENEFIT	PRODUCT TECHNOLOGIES	STANDARD	PREMIUM
