

Existco Pallet Scanning System

Sometimes your goods get lost during despatch and you don't know where to find it? Driver A says it was Driver B. Driver B says it was not him and maybe it was Driver C and so on. At the end of the day, guess who is affected the most? You are... Don't panic. Let us help you!

Existco Pallet Scan System will make all the pains go away. With this application, you will know exactly which products go onto which pallets and carried by which trucks and at what date and time. This information is captured on Mobile Computer and then transferred to PC via ActiveSync connection for further process if needed.

Users can easily add/edit the Product List on the PC or Mobile Device. The system also comes with password protection to prevent unauthorised people from modifying the Product List.

The system is designed so be easy to use. Everything is at your fingertips. Scan, scan and click are most what you have to do to keep track of thousands of products in transition. How easy it is.

The system uses the latest Barcode technology with international Barcode Standards. You are even can design your own Barcode to match with your existing system.

This might sound only half of what you are looking for? No problem! Customized software package is our expertise. We will get you exactly what you want!

Product Scanning

Order Packing

Pallet Despatch

Product Barcode

Label Printer

Mobile Computer

Features

- Keep tracks of your products during goods despatch.
- Using latest barcode technology and industry standards.
- Load Product List from simple Excel files.
- Search for a particular product using barcode.
- Keeps track of information such as Product Barcode, Product Code, Product Description, Pallet Serial Number, Pallet Quantity, Truck Registration Number
- Simple and easy to operate.
- One step data synchronization between device and host PC
- Transaction records are kept in CSV files for easy edit
- Ability to print out transaction records when synchronizing
- Print Settings are configurable (e.g: number of copies...)

Benefits

- Prevent loss of product during despatch.
- No More paper work despatching.
- Faster processing of Despatching.
- High Accuracy Despatching.
- Save time and money.
- Low cost with better outcome solution.
- Professional services and supports.

System Requirements

Operating System supported: Windows 2000, XP, Vista and Windows 7.

Disk Space : Min 160MB (Requires .Net 2.0 or 3.5 Framework)

CPU / Memory : Operating System Minimum Requirements

How It Works

The process will involve operations on the PC as well as on the Mobile Device.

On the PC, the operators upload Product List to Existco Pallet Scan System via Excel sheets.

Barcode labels are printed and placed on products, and/or some products may already have barcodes.

The operators dock Mobile Computer to Cradle for data synchronization. The system will then update the latest Product List onto the Mobile Device so that Operators can start processing the next batch.

The operators then scan Products, Pallets and fill in required information. The data collected is saved onto the Mobile Computer, and users have the ability to edit saved information if needed.

Once finished, users dock the mobile computer in the cradle and perform data synchronization to host PC.

Existco Pallet Scan System will get data collected from Mobile Computer. The processed data can be printed as well as stored on PC for later reviews and searches.

No more lost tracks of where your goods are. Everything is tracked and recorded with the least effort.

How good is that?

Why Existco

Existco is a reputable Solution provider with Alliances with the major Brand Names such as Zebra, Intermec, Datalogic, Motorola, Brady and many more.

Existco is also a Microsoft Certified Partners and GS1 Alliance Partner.

Enjoy the professional service and full turnkey solutions at Existco.
