Obv!os® Pilum II

PRODUCT DESCRIPTION

The Pilum II uses the same advanced technology as the Glaive model, packaged in a compact wallmountable device.

Available in both non-touch and touch versions, the Pilum is a powerful sales and marketing tool in fast food hospitality and general retail.

The robust construction makes it ideal for environments where it is accessible by the general public, such as table-based ordering, and its economical spacesaving design allows it to blend into any setting.
