

Roshtek Asset Manager

Version 1.0

Are you tired of losing track of your company assets & wasting your time searching for misplaced or lost equipment?

Roshtek Asset Manager

V.1.0

Roshtek Asset Manager is industry-leading asset tracking solution for small to medium-sized businesses. Roshtek has perfected an all in one solution to solve the asset management needs of Mining, General Trades, Government and Educational agencies, Healthcare, and small to large companies across the globe. Roshtek Asset Manager is capable of meeting the high demands of your business while still remaining simple enough to master right out of the box!

Roshtek Asset Manager keeps the locations of your valuable assets at your fingertips, preventing you from having to search for misplaced, unreturned, or lost assets. In addition, detailed information on each asset, including what site, location and even department it is currently in, who checked it in or out, the cost of the asset, when the warranty period expires, and even when maintenance is due on the asset is all captured by the system.

Roshtek Asset Manager also stores the transaction history of an asset, so you know where it has been, how many times it has been broken or serviced, and who was the last person to check it out and for how long.

Roshtek Asset Manager even gives you the power to easily audit your assets to ensure 100% accuracy. If you're currently using a spreadsheet, pen and paper, or are currently unhappy with your existing asset tracking package, M Roshtek Asset Manager will help your organization save time and money while better utilizing company equipment.

Roshtek Asset Manager is the perfect asset management solution when you need the flexibility and freedom of a mobile device. Often, managing company assets while sitting in front of a computer is not possible or efficient. With a mobile device, you can take Roshtek Asset Manager to remote locations, whether there in a different room, different building, or out in the field.

► Tool Tracking

► Computer Equipment Tracking

► Any Assets Tracking

*Know exactly what assets you have, where they are located
and who they are checked out to!*

Benefits

- ▶ Know what your company has and which employee or client has it
- ▶ Know the cost of your assets & depreciation amounts
- ▶ Reduce expenses – Don't buy unnecessary items
- ▶ Spend less time searching for your equipment and assets
- ▶ Reduce lost or unreturned items
- ▶ Reduce "borrowing" without permission
- ▶ Operate on a tighter budget with better service
