

## TotalCount – WL100 People Counter

The **TC-WL100** has the Sensor and Counter Module all on a single bracket.

**All Our People Counters are designed to be easy to set-up and simple to operate.**

### The Sensor

The WL100 Photo Electric Sensor is manufactured by sensor technology pioneer Sick Pty Ltd. The sensor is robust, dustproof and not effected by some stray water. Enclosure Rating (IP65).

They have a **Polarizing Filter** which enables them to detect through glass – at least through a single standard glass door.

With an operating range to its Reflector of up to **4 metres** the unit covers many single and double door applications. The Sensor is **tiny** measuring a mere 20 x 25.4 x 11 mm.

### The TotalCount DES3 Counter Module

The Counter is an 8 digit LCD display with a digit height of 8 mm. The unit can handle really high numbers and is clear and easy to read.

To **Reset the Counter to Zero** a Magnet is applied externally to the right of the LCD – two Magnets are included in the pack.

The Counter Module and accompanying electronics are housed in a matt black box measuring 54 x 38 x 23 mm.

### Included in the Pack:

- WL-100 Sensor with Counter Module
- 9-Volt DC Unregulated Plug-Pack
- Multi-Directional Bracket for the Sensor and Counter Module
- Reflector measuring 50 x 50 mm
- Reflector Bracket – this is included but of course not always needed.
- Screws etc for ease of installation.
- Instruction Leaflet

The TC-WL100 can also come with **Auto-Halve, Battery Back-Up** and **Addmitter Transmitter/Receiver**

**Ordering Code: TC-WL100**
