

The OPD 7124 hand held 2D gun with Bluetooth connectivity relieves users from the restriction caused by cables. They will be freer to work more efficiently within their work-space. Even when out of radio range, the OPD 7124 can continue to capture data. Thanks to it's built-in memory, barcodes can be stored, and once Bluetooth communication is re-established, the data captured can be automatically released from it's buffer to the host computer.
